

wage gap so that every individual, regardless of gender, can receive a fair wage for work they do.

REPARATION

(Ms. JACKSON LEE asked and was given permission to address the House for 1 minute.)

Ms. JACKSON LEE. Madam Speaker, we have had a tumultuous, but yet invigorating 2 weeks. Just a week ago, we were able, in the Judiciary Committee, to pass H.R. 40, the Commission to Study and Develop Reparation Proposals.

Those who voted for it came from all parts of the country and represented all racial groups. It was a wonderful experience of understanding the cruciality and recognizing the slave history of African Americans and further developing proposals to deal with the dastardly impacts on African Americans.

We are delighted to have the support of Japanese Americans, Hispanic Americans, Asian Pacific Americans, and, of course, White Americans because they understand the healing power of H.R. 40.

Then we just recently had a judgment—as I have said on this floor, I know the Floyd family. They are America's family.

We had a judgment on Tuesday that showed the strength of America and her justice system and the recognition that we are all created equal and each one has to be held accountable for his actions.

So this has been a good week. America needs to know that. We look forward to passing H.R. 40 on this floor in celebration of the commemoration of Juneteenth when slaves were finally freed and passing the George Floyd Justice in Policing Act.

ISSUES OF THE DAY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 4, 2021, the gentleman from Texas (Mr. GOHMERT) is recognized for 60 minutes as the designee of the minority leader.

Mr. GOHMERT. Madam Speaker, it is my honor to yield to the gentlewoman from Florida (Mrs. CAMMACK).

FARMERS TO FAMILIES FOOD BOX PROGRAM

Mrs. CAMMACK. Madam Speaker, last week the press—not the Department of Agriculture—reported that the Trump administration's Farmers to Families Food Box Program would come to an end.

In subsequent reporting and an unapologetic email from the USDA, it was made clear that the only reason for its termination was because of the man who created it.

The Farmers to Families Food Box Program had open eligibility, making certain anyone and everyone in need, regardless of status, income, or household size, had supplementary access to

fresh meats, dairy, and produce. Since May 2020, this program has provided more than 156 million boxes to households across the United States.

Farmers to Families provided an alternative market for food intended for restaurants and food service, creating outlets for supply chains. Due to COVID this food could not easily be realigned to retail markets quickly enough to prevent spoilage. Even today, Farmers to Families provides fresh products in greater quantities than traditional emergency feeding programs—items such as dairy, meat, and fresh produce, which have always presented unique logistical challenges for distribution.

The program reemployed workers in the commercial food distribution sector whose work was halted by the closure of restaurants, hotels, and other food service industries during COVID.

□ 1300

In my own district, L&M Farms, a participant in the program, managed to supply more than 600,000 boxes of fresh produce to those in need.

Regardless of the various hiccups heard during USDA's listening sessions in previous hearings and from Members of this very House, the program worked exactly as intended, as a lifeline for consumers and producers alike during a challenging time.

Nine hours after the press broke the story, USDA relayed, via email, that commodity purchases will “continue to occur and be directed to existing, reliable channels of distribution.”

This leads me to believe that locally focused producers and distributors who benefited greatly from Farmers to Families are being traded in for billion-dollar organizations that have already received billions in government aid to perpetuate dependence instead of eradicating it.

Madam Speaker, I hope this body comes together to voice their strong opposition to the termination of this small piece of salvation that had a positive impact on all of our local communities, particularly those in rural areas.

Mr. GOHMERT. Madam Speaker, I thank my friend from Florida, who truly is my friend, for her comments.

At this time, it is my privilege to yield to the gentleman from Indiana (Mr. BAIRD), my friend, a Baird man.

PLIGHT OF LAKES SHAFER AND FREEMAN

Mr. BAIRD. Madam Speaker, I appreciate my good friend from Texas allowing me to share with this body the program that I have for today.

Madam Speaker, I rise today to call attention to the overwhelming challenges plaguing a community in my district. It is located in White and Carroll Counties of west central Indiana. The communities surrounding Lakes Shafer and Freeman are a recreation destination for Hoosiers from all across the State and from Americans across the country.

The Twin Lakes, as they are known, straddle the small community of Mon-

ticello. In the nearly 100 years since the two reservoirs were created by damming up the Tippecanoe River, their far-reaching attraction has created a flourishing local economy built on tourism, replete with the trappings of a family vacation, including its own amusement park, cruise boat, resort, marina, and much more.

Despite all the buildup of amenities of this Hoosier destination, the lakes remained the focal point of the community and the driving force of the regional economy. Unfortunately, lake conditions can also have a negative impact on the local area.

At the hands of Mother Nature and outside forces, these crown jewels of the region have been tarnished. On multiple occasions, Lake Freeman, because of drought conditions, has been drained to the riverbed that flows at the bottom.

Unfortunately, these episodes of diminishing lake levels have come at an increasingly frequent rate in recent years and in times of even moderate drought conditions. These droughts caused the lake to become almost completely drained and resulted in devastation to the natural ecology and the local economy.

Businesses, homes, property—both real and personal—tax revenue, and the loss of family time are all impacted. The past 7 months have been one of those times as drought conditions last summer once again caused Lake Freeman's water level to plummet by more than 13 feet, completely draining the vast majority of this 1500-acre reservoir.

One victim of this devastation is the disruption of local ecological balance. During the worst parts of the episode, area residents walked the lake bed only to find dead turtles, fish, mussels, and more that had succumbed to the lack of water.

Safety also became a tremendous challenge for locals and boaters as water levels sank, exposing stumps, sharp objects, and other items usually covered by the water.

These impacts on the lake quality are especially disappointing to a community that has prided itself in its conservation stewardship of the lake. Members of the community have banded together to form Shafer & Freeman Lakes Environmental Conservation Corporation, also known as SFLECC.

This volunteer group raises thousands of dollars every year to fund the Summer Lakes Clean Up project. Over the years, this group has volunteered over 17,000 hours in helping preserve the beauty and natural environment of the lakes.

Residents are facing tremendous economic costs as well. Property values have plunged; local drinking water and drinking wells have dried up; retaining walls have buckled, threatening to collapse; and boats are stranded and unable to be winterized.

The financial costs to solve these issues are too high for many residents.
